EDUCATION

Raffles University

Diploma in Information Technology
2024 - 2026

SMK Taman Bukit Indah

SPM
2017-2023

SKILLS

Programming Languages

- C++
- Dart
- Python
- SQL
- JavaScript
- PHP

Web Technologies

- HTML
- CSS

Frameworks & Platforms

- Flutter
- Supabase

Database & Backend

- PostgreSQL
- Supabase Database
- Authentication
- REST API Integration

Development Tools

- Git
- GitHub
- Android Studio
- VS Code

Data & Productivity Tools

- Microsoft Excel

Other Skills

- UI/UX Design
- Database Design

Currently Learning

- TypeScript

LANGUAGE

English

Chinese

Malay

ABOUT ME

Diploma in Information Technology student with hands-on experience developing mobile applications and academic software projects using Flutter, Supabase, SQL, and C++. Developed projects involving university management, smart campus services, database integration, authentication, and role-based systems. Interested in software engineering, mobile development, web development, and game development. Currently seeking an internship opportunity to gain real-world development experience and learn how professional teams plan, assign, develop, test, and deliver software.

PROJECTS

UniSmart (FYP)

----- 2026

- Developed a role-based university management mobile application for students, lecturers, and staff.
- Implemented modules including QR attendance, subject registration, timetable, examination information, feedback management, and programme management.
- Integrated Supabase authentication, PostgreSQL database, role-based access control, and real-time backend services.
- Designed the application architecture and database structure while managing dependencies between multiple academic modules.

CampusGo My

----- 2026

Course Project – Mobile Application Development
Technologies: Flutter, Dart

- Developed a mobile application aimed at improving campus life for university students.
- Implemented modules for timetable management, campus navigation, and event discovery.
- Designed intuitive user interfaces following mobile UI/UX principles.
- Applied state management and responsive design techniques.
- Conducted testing to ensure usability and application performance.

Hangman Game

----- 2025

Course Project – Object-Oriented Programming
Technologies: C++

- Developed a console-based Hangman game using Object-Oriented Programming principles.
- Designed classes for game logic, player interaction, word selection, scoring, and game-state management.
- Applied encapsulation, abstraction, inheritance, polymorphism, and input validation.

CERTIFICATIONS

AWS

- AWS Academy Graduate - Cloud Foundations - Training Badge

Alibaba

- Alibaba Cloud Product Capability Certification

CISCO

- Cyber Threat Management
- Junior Cybersecurity Analyst Career Path Exam
- Introduction to Cybersecurity
